

# NURSING PROFESSIONAL PRACTICE MODEL EXAMINED

## OUR STRATEGIC PLAN FOR NURSING

The outer ring of the Patient & Family Care model contains the Strategic Plan for Nursing, which includes Growth and Stewardship, Staff Development, Patient Care, and Patient Experience. This model aligns nursing practice with the mission, vision, values, and philosophy of nursing.

## OUR INSPIRATION

The Professional Practice Model is inspired by the Ventura County Health Care Agency's logo. In recent years, our profession has encountered numerous challenges. Studies have shown that ocean colors and sunsets have mental health benefits. The color blue is linked to feelings of calm and tranquility, while watching a sunset can reduce stress, enhance emotional well-being, and provide a moment for reflection.

## OUR PRACTICE

Located in the middle of the Professional Practice Model is a heart, symbolizing Patient & Family Centered Care. Our practice is rooted in the AACN Synergy Model which asserts that the patient's needs drive the nurse's competencies.

## OUR VALUES

A wave of values—compassion, service, equality, accountability, evidence-based practice, trust, empowerment, excellence, respect, and transparency—flows through the heart, representing the core beliefs that the nurses working at the Ventura County Health Care Agency hold close to their hearts.
